#### Weekly Dams Situation

##### CATCHMENTS RESERVOIRS - WEEKLY STATUS UPDATES

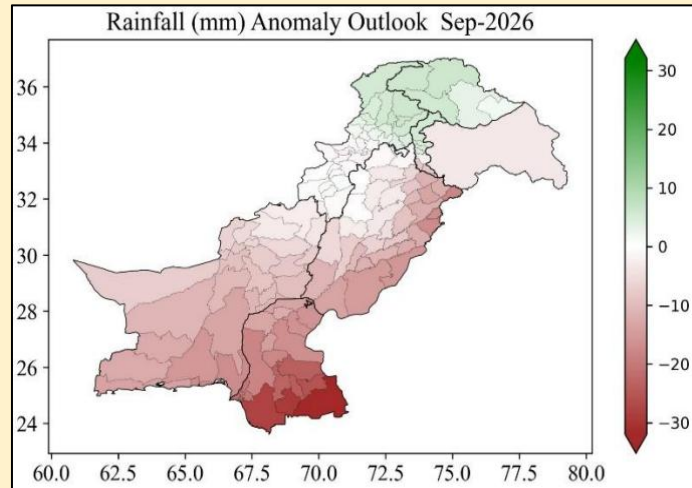

| RIVERS  | DAMS        | MCL* (Feet) | Current Filled Status | Filled Percentage |
|---------|-------------|-------------|-----------------------|-------------------|
| INDUS   | Tarbela Dam | 1550.00     | 1549.38               | 99%               |
| JHELMUM | Mangla Dam  | 1242.00     | 1222.05               | 79%               |
| SUTLEJ  | Bhakra Dam  | 1680.00     | 1639.62               | 61%               |
| BEAS    | Pong Dam    | 1390.00     | 1370.29               | 71%               |
| RAVI    | Thein Dam   | 1732.00     | 1687.14               | 58%               |

MCL\* = Maximum Conservation Level

#### As per 0600 Hrs FFD Report:

- All the Rivers are flowing within normal limits.

## MONTHLY OUTLOOK - SEPTEMBER

### According to Met Department;

- **Below-normal rainfall** is expected over most parts of the country during September 2026.
- **The highest negative anomalies** are expected over central to southern Pakistan,.
- In contrast, **near-normal to slightly above-normal rainfall** is anticipated over the northern parts of the country.
- **Above-normal temperatures** across most parts of the country during September 2026.
- **The highest probabilities** are likely to prevail over central Punjab.

## POSSIBLE IMPACTS

- **Dry conditions** are much **supportive for harvesting** particularly for cotton and peanut.
  - The reduced rainfall **may fail to fulfill irrigation needs** for seasonal vegetables and growing Kharif crops, particularly in Punjab, requiring supplemental irrigation.
  - Despite below-normal rainfall, **isolated heavy downpours** during the start of the season may still **trigger flash flooding** in **mountainous areas of Punjab**, urban flooding in big metropolitan areas and hill torrents in southern Punjab.
  - **Above normal temperature** along with rainfall spell may enhance probability **flash floods, and landslides** in mountainous and other vulnerable areas particularly during first half of the month
  - **Spatial temperature gradient** may cause strong winds, dust storms, and thunderstorm and hailstorms which may affect seasonal crops, vegetables, and orchards; farmers are advised to take **precautionary measures to protect standing crops**.
  - **Dengue outbreaks** are possible in **flood-affected and poorly drained areas**, particularly in urban and low lying regions of the country
- **Advisory for general public:**
- Farmers are advised to visit PDMA & PMD advisories on website before irrigation or harvesting.
  - Travelers and tourists are advised to remain cautious while travelling during rainfall events.
