MCL* = Maximum Conservation Level

As per 0600 Hrs FFD Report:

- All the Rivers are flowing within normal limits.

WEATHER ADVISORY

RAIN-WIND/THUNDER SHOWER PREDICTED IN THE UPPER PARTS OF THE COUNTRY

According to Met office informed that monsoon currents are penetrating upper parts of the country. A westerly wave is also likely to enter upper parts of the country and likely to strengthen on 14 th September (Monday). Under the influence of this weather system:

- Rain-wind/thundershower (with isolated heavyfall/hailstorm) is expected in Rawalpindi, Murree, Galliyat, Jhelum, Chakwal, Talagang, Attock from 12th to 17th September with occasional gaps.
- Rain-wind/thundershower (with isolated heavyfall/hailstorm) is expected in Lahore, Sialkot, Sheikhupura, Narowal, Mandi Bahauddin, Gujrat, Gujranwala, Wazirabad, Hafizabad, Kasur, Okara, Nankana Sahib, Sargodha, Khushab, Mianwali, Noorpur Thal, Faisalabad, Jhang, Toba Tek Singh, Layyah, Bhakkar, Sahiwal, Dera Ghazi Khan, Multan and surroundings from 14th (evening/night) to 17th September with occasional gaps.

IMPACTS & PREVENTIVE MEASURES

- Heavy rains may cause Urban flooding in low lying areas of Rawalpindi, Gujranwala, Gujrat, Sialkot, Faisalabad and Lahore from 14th & 17th September.
- Heavy rain may cause flash flooding in local streams/ Nullahs in Kashmir, Murree, Galliyat and Rawalpindi from 14th & 17th September.
- Landslides may occur in hilly areas of Murree and Galliyat during the forecast period.
- Temperature is likely to drop during the forecast period.
- Tourists and travelers are advised to remain cautious during the forecast period.
- Farmers are advised to manage their crop activities keeping in view the weather conditions.

MONTHLY OUTLOOK - SEPTEMBER

According to Met Department;

Below-normal rainfall is expected over most parts of the country during September 2026.

- The highest negative anomalies are expected over central to southern Pakistan,.
- In contrast, near-normal to slightly above-normal rainfall is anticipated over the northern parts of the country.
- Above-normal temperatures across most parts of the country during September 2026.
- The highest probabilities are likely to prevail over central Punjab.

POSSIBLE IMPACTS

- Dry conditions are much supportive for harvesting particularly for cotton and peanut.
- The reduced rainfall may fail to fulfill irrigation needs for seasonal vegetables and growing Kharif crops, particularly in Punjab, requiring supplemental irrigation.
- Despite below-normal rainfall, isolated heavy downpours during the start of the season may still trigger flash flooding in mountainous areas of Punjab, urban flooding in big metropolitan areas and hill torrents in southern Punjab.
- Above normal temperature along with rainfall spell may enhance probability flash floods, and landslides in mountainous and other vulnerable areas particularly during first half of the month
- Spatial temperature gradient may cause strong winds, dust storms, and thunderstorm and hailstorms which may affect seasonal crops, vegetables, and orchards; farmers are advised to take precautionary measures to protect standing crops.
- Dengue outbreaks are possible in flood-affected and poorly drained areas, particularly in urban and low lying regions of the country
- **Advisory for general public:**
 - Farmers are advised to visit PDMA & PMD advisories on website before irrigation or harvesting.
 - Travelers and tourists are advised to remain cautious while travelling during rainfall events.
