### NEXT 24 HOURS WEATHER SITUATION

#### ACCUMULATED RAINFALL

#### Weather Forecast for Next 24 Hours

Scattered thunder storm rain of moderate intensity with **isolated heavy falls** is expected over the upper catchments of rivers Jhelum, Chenab, Ravi and Sutlej along with Rawalpindi, Sargodha, Lahore and Gujranwala Division. **Isolated** thunder storm/rain of light to moderate intensity is expected over the upper catchments of rivers Indus with, DG Khan and Bahawalpur Divisions.

#### WEEKLY RAINFALL OUTLOOK

**WIDESPREAD** thunder storm rain of **MODERATE to HEAVY** intensity with **Scattered VERY HEAVY falls and isolated EXTREMELY HEAVY rainfall** is expected over the upper catchments of all the major rivers along with Rawalpindi, Sargodha, Gujranwala, Lahore and DG Khan Divisions. **Scattered thunderstorm rain with Isolated Heavy Falls** is also expected over Multan, Bahawalpur, Sahiwal and Faisalabad Divisions.

#### Meteorological Features (influencing the weather in next 24 Hours)

Yesterday's trough of a **strong westerly wave** over northeast Iran now lies over northwest Afghanistan. The **Monsoon Low** that was over north Odisha has moved westward to east Madhya Pradesh and intensified into a **well-marked monsoon low**. There is a possibility of interaction between the westerly wave and monsoon winds from July 29th to August 1st. Mild moist currents are penetrating the upper parts of the country from the Arabian Sea and Bay of Bengal up to 3000 feet, likely to strengthen during this period. The core of the jetstream, with wind speeds exceeding 110 knots, lies north of Afghanistan and may approach the upper parts of the country from July 30th, potentially enhancing rainfall activity. Speed divergence in the Arabian Sea and the lower half of the country, along with speed convergence over the upper half, could lead to **very heavy rainfall in the upper half of the country**. A well-marked seasonal low lies over northwest Balochistan.
