WEATHER ADVISORY

DUST/WINDSTORM & RAIN-THUNDERSTORM PREDICTED IN THE PROVINCE FROM 11TH TO 13TH JUNE

Met office has informed that a Western Disturbance is likely to approach upper parts of the country from 11th June and likely to persist till 13th June. Moist currents from Arabian sea are also likely to penetrate upper and central parts from 11th June. Under the influence of this weather system.

- **Scattered dust/windstorm & rain-thunderstorm (with few heavyfalls/hailstorm)** is expected in **Rawalpindi, Murree, Galliyat, Attock, Chakwal, Jhelum, Mandi Bahauddin, Gujrat, Gujranwala, Hafizabad, Wazirabad, Lahore, Sheikhupura, Sialkot, Narowal, Sahiwal, Jhang, Toba Tek Singh, Nankana Sahib, Chiniot, Faisalabad, Okara, Kasur, Khushab, Sargodha, Noorpuhal, Bhakkar, Layyah Mianwali, Bahawalpur, Bahawalnagar, D.G. Khan, Multan, Khanewal, Lodhran, Muzaffargarh, Rajanpur, Rahimyar Khan and Kot Addu** from **11th to 13th June** with occasional gaps.

IMPACTS & PREVENTIVE MEASURES

- **Strong windstorm/ hailstorm & lightning** may damage weak structures (solar panels, electric poles, bill boards etc.) during the forecast period.
- **Heavy rains** may cause Urban/Flash flooding in Rawalpindi/Islamabad, Gujranwala, Sialkot, Lahore and Faisalabad.
- Farmers are advised to **manage their crops activities** according to the prevailing weather conditions.
- Tourists and travelers are advised to **remain extra cautious and avoid unnecessary travelling** during the forecast period.

MONTHLY RAINFALL OUTLOOK - JUNE

According to Met Department;

- **Near-normal to slightly below-normal rainfall** is largely anticipated across the country during June 2026, with the **most pronounced negative anomalies** expected over **northeastern Punjab**.
- In contrast, **Normal rainfall** is likely over the **southern regions of punjab**
- Overall, rainfall is expected to exhibit considerable spatial variability

POSSIBLE IMPACTS

- **Below-normal rainfall** is likely to **reduce water availability**, increasing reliance on storedwaterandgroundwater for agriculture.
- The **reduced rainfall** may **fail to fulfill irrigation needs** for seasonal vegetables and growing Kharif cropsinPunjab, requiring supplemental irrigation.
- **Above-normal temperatures** may cause **heat stress** on newly sown and early-stage Kharif crops; timelyirrigation management is advised to minimize potential losses.
- **Elevated temperatures** over northern areas pf country are likely to **accelerate snowmelt**, while slightly above-normal rainfall in northern regionns may further exacerbate the situation, increasing the risk of flash floods and landslides in mountainous and flood-prone areas.
- Despite **below-normal rainfall**, isolated heavy downpours may still trigger localized urban flooding in major cities, particularly in poorly drained and low-lying areas.
- **Spatial temperature gradient** may cause strong winds, dust storms, and hailstorms whichmayaffectseasonal crops, vegetables, and orchards
- **Farmers** are advised to take precautionary measures to protect standing crops.
