## EXECUTIVE SUMMARY

Nestled within the majestic embrace of the outer Himalayas, Murree stands as a preeminent and highly frequented hill station of Pakistan, situated approximately 50 kilometers to the northeast of the Federal Capital, Islamabad. Geographically positioned at a commanding altitude of approximately 7,500 feet (2,291 meters), and located at the coordinates of approximately 33°54'15" North latitude and 73°23'25" East longitude, the region encompasses four principal sections: Murree city, distinguished as the highest elevation point; Patriata, renowned for its scenic vistas; Kuldana, characterized by its serene ambiance; and Gharial, offering its unique charm. The territorial boundaries of Murree are demarcated by the Jhelum River to the east, the districts of Abbottabad and Haripur to the north and west, the Islamabad Capital Territory to the southwest, and the Kotli Sattian Tehsil to the south.

Murree experiences a notably agreeable summer season, typically spanning the months of June through August. During this period, ambient temperatures generally fluctuate between a minimum of 13°C to 16°C and a maximum of 20°C to 25°C. This season is widely regarded as the prime period for visitation to the area, attracting a substantial influx of tourists seeking respite from the warmer regions. Conversely, the winter months, extending from December to March, are characterized by significant snowfall and temperatures that frequently descend to freezing levels, transforming the landscape into a picturesque waterscape.

Furthermore, the region witnesses notable surges in tourist activity during four primary occasions: the religious festival of Eid-ul-Fitar, which was observed on the 31st of March 2025; the religious festival of Eid-ul-Adha, anticipated around the 7th of June, 2025; the national observance of Independence Day on the 14th of August; and the celebratory occasion of New Year's Eve. These events invariably lead to a considerable augmentation in the number of visitors, occasionally resulting in conditions of heightened congestion within the popular locales. Presently (as of April 12, 2025), Murree is experiencing a period of partly cloudy weather, with temperatures ranging from an approximate low of 10.5°C to a high of around 22°C. This interim period offers a relatively tranquil atmosphere before the anticipated commencement of the peak summer tourist season. The enduring allure of Murree lies in its captivating natural beauty and its accessibility as a favoured destination for both domestic and international travellers throughout the year.

# Inclusion of vulnerable group (Pregnant Women, Lactating Women, Neonates and Person with Disabilities)

Disasters severely impact vulnerable populations, particularly those living in disaster-prone mouzas along rivers and hill torrents. Pregnant women, lactating mothers, neonates, and persons with disabilities face increased health risks, including maternal and neonatal complications, malnutrition, infectious diseases, and psychological distress. The Provincial Disaster Management Authority (PDMA) Punjab plays a critical role in disaster response by ensuring timely medical assistance and reducing health risks for these high-risk groups.

This Data Collection Performa has been developed to systematically gather essential information to assess the health, nutritional status, and specific needs of vulnerable populations in flood-affected and disaster-prone mouzas. The collected data will support effective disaster response and recovery efforts, ultimately reducing morbidity and mortality.

## Psycho-Social Support During Emergency

Psycho-social support during disasters like floods is important because it helps people cope with stress, fear, and loss. It provides emotional care, counseling, and community support to reduce trauma and anxiety. This support is especially crucial for vulnerable groups like children, the elderly, and persons with disabilities. It strengthens resilience, helps people recover faster, and rebuild their lives with hope and stability.

## **Tourist Education & Awareness**

After much deliberation it was pointed out that a major reason for tragic incident of Murree snowfall was partly due to lack of awareness provided to the tourists as they were found ill prepared for any emergency. The method to ensure effective campaign of awareness will involve the following:

## 2. Hazards

- Disasters occurred over the past two to three decades and their impact on communities and development sectors. *Snow Blizzard, Forest Fire and landslide are occurred and EarTHQuake is a potential hazard.*
- Provide a brief description of the hazards being planned for (medium and high risks), including potential location that could be affected; *Mentioned upper*
- Briefly outline the triggers. *Forest Fire, Landslide and influx of tourists*
- In District Murree, the communities are mainly affected from the heavy snow/rainfall hazards landslides and forest fire incidents. In the past two or three decades there have been a large number of forest fire incidents occurred in different parts of Murree, however the same were coped up with the specialized forest firefighting squad and rescue department. Moreover, no major and minor flood has been seen during the period.
- The main reason for the above mentioned hazards due to the extreme weather conditions in the area that certainly provoke the incidents and at the same time due to the high influx of seasonal/occasional tourism, in case a disaster does occur, it is hard to manage the situation due to lack of infrastructure, particularly the low traffic flow rate and awareness amongst the public. However, with the help of the allied departments, the district Administrations working hard to minimize the damage caused by the above mentioned hazards
- In light of this information the following routes have been identified as being most crucial for snow clearing operation and management of traffic. Some of these major roads have also been notified as one way during peak season.

The following roads have been identified as most important as can be seen from the Guide Map below as well.

## ANNEX XII: CAMP MANAGEMENT SOPS

- Camps would be established in areas accessible by metalled roads so that provision of essential facilities is not difficult
- Basic facilities such as food, clean drinking water, health, hygiene and sanitation should be available at these shelters.
- Proper registration mechanism should be in place to differentiate between those actually affected and cunning opportunists
- Proper security system should be in place in coordination with the local police as the presence of police always acts as deterrence for criminals who may be attracted to such places.
- Emergency medical care should be available as well as a proper firefighting system as fire out breaks are common in such tents
- Proper camp management should be announced and notified and there should be a complaint cell as well
- A proper distribution mechanism should be in place to ensure that the needy get what they deserve.
- Scattered camps should be catered for and encouraged to join the main camp.
- At times shallow hand pumps are not safe for drinking as the water underground has been affected. In such cases clean medicated water should be provided through water bowsers.
- Vector control is an essential part of the camp management and steps should be taken to remove rats, snakes and mosquitoes etc.
- Un-accompanied and missing children shall be placed separately with proper care and fulfilment of their physical and psycho-social needs.
- Needs of women as per local and cultural environment shall be considered for establishing separate relief camps for ladies with provision of proper security and light arrangements.

# ANNEX XV: LIST OF BASIC TERMS

## **Acceptable risk**

The level of loss a society or community considers it can live with and for which it does not need to invest in mitigation

## **Biological hazard**

Biological vectors, micro-organisms, toxins and bioactive substances, which may cause the loss of life or injury, property damage, social and economic disruption or environmental degradation.

## **Capacity**

A combination of all the strengths and resources available within a community, society or organization that can reduce the level of risk, or the effects of a disaster.

Capacity may include physical, institutional, social or economic means as well as skilled personnel or collective attributes such as leadership and management. Capacity may also be described as capability.

## **Capacity building**

Efforts aimed to develop human skills or societal infrastructure within a community or organization needed to reduce the level of risk. In extended understanding, capacity building also includes development of institutional, financial, political and other resources, at different levels of the society.

## **Climate change**

The climate of a place or region is changed if over an extended period (typically decades or longer) there is a statistically significant change in measurements of either the mean temperature or variability of the climate for that region.

## **Coping capacity**

The means by which people or organizations use available resources and abilities to face a disaster. In general, this involves managing resources, both in normal times as well as during crises or adverse conditions.

## **Disaster**

A serious disruption of the functioning of a community or society causing widespread human, material, economic or environmental losses which exceed the ability of the affected community or society to cope using its own resources. It results from the combination of hazards, conditions of vulnerability and insufficient capacity to reduce the potential negative consequences of risk.

## **Disaster risk management (DRM)**

The comprehensive approach to reduce the adverse impacts of a disaster. DRM encompasses all actions taken before, during, and after the disasters. It includes activities on mitigation, preparedness, emergency response, recovery, rehabilitation, and reconstruction.

## **Disaster risk reduction/disaster reduction**

The measures aimed to minimize vulnerabilities and disaster risks throughout a society, to avoid (prevention) or to limit (mitigation and preparedness) the adverse impacts of hazards, within the broad context of sustainable development.

## **Early warning**

The provision of timely and effective information, through identified institutions, to communities and individuals so that they could take action to reduce their risks and prepare for effective response.

## **Emergency management**

The management and deployment of resources for dealing with all aspects of emergencies, in particularly preparedness, response and rehabilitation

## **Forecast**

Estimate of the occurrence of a future event (UNESCO, WMO). This term is used with different meanings in different disciplines.

## **Geological hazard**

Natural earth processes that may cause the loss of life or injury, property damage, social and economic disruption or environmental degradation. For example earthquakes, tsunamis, volcanic activity and emissions, landslides, rockslides, rock falls or avalanches, surface collapses, expansive soils and debris or mud flows.
