CHAPTER -I

DISTRICT Profile

Layyah got the status of district in 1982 and comprised of three Tehsils Layyah, Karor Lal Eson and Choubara. Before coming under the administrative jurisdiction of district Layyah, Layyah was part of Muzafargarh District. These arrangements had impacts on the social, political and economic relationship of Layyah. Layyah is now part of Dera Ghazi Khan Division along with the district of Jhang, Muzafargarh and Rajanpur. All these four districts make the southernmost zone of Punjab. It lies between 30-45 North latitude and 70-71 East longitude. The total area covered by the district is 6,291 km² with a width from east to west of 88 km and a length from north to south of 72 km.

This District is surrounded in the north by Bhakkar District, in the south by Muzafargarh, in the east by Jhang Districts and D.G Khan District lies in the west. River Indus flows on its western side across which lies in district Bhakkar and on the South district Muzaffargarh. District Layyah comprises the three tehsils of namely Layyah, Karor Lal Eson and Choubara. Current population of District Layyah is 1,824,230 having Urban 321,505 (162,924 Male and 158,517 Female) and rural 1,502,725 (762,399 Male and 740,300 Female) population. Total households reside in district are 268,244.

Layyah is ranked at number 38 nationally with an education score of 66.76. The learning score of Layyah is 70.8. The readiness score of Layyah is 65.13 and the school infrastructure of Layyah score is 94.38 placing it a national rank of 18. The score reflects that most schools in Layyah have all basic facilities e.g. electricity, drinking water and functional toilets.

Geology and Climatology

The District Layyah has an extremely hot climate. The temperature in winter is low due to nearness to Koh-Suleman range of mountains and Thal desert of Tehsil Choubara. The Tehsil Choubara is almost barren and consists of range forest and sand dunes. It is actually a Rakh under the control of Forest and Range management Department. The tehsil of Layyah and Karor are comparatively better developed agriculturally but they have also large tracks of sand dunes and uncultivated land.

The soils in the district can be divided into two broader categories. The area/strip that lies along river Indus is part of its active flood plain and composed of loamy and some stratified sandy soils that are found in young flood plains. The area lying next to this is part of Thal desert. Here rolling to hilly sandy soils of Aeolian deserts are found. The difference in soils structure and moisture regimes in the district has translated into difference in the natural vegetation.

In the riverine zone, thorny vegetation is found where as in the desert zone, desertic and semi desertic vegetation are found. In terms of natural use of land. Major portion of the district can be termed a rough grazing land. The areas lying along and closer to river Indus are able lands. Small pockets of the district are under the forest cover. Climatically Layyah is part of the hot, arid/dry zone of Pakistan. The average

annual rainfall is less than 33 mm. The area receives most of the rainfall during summer. The summers are long and very harsh. Dust storms are quite powerful and common in the desert zone. In this zone, even during the summer, nights are very pleasant.

OBJECTIVES

1. To deal with the flood like situation on emergent basis and to provide immediate complete medical cover for the safety of human livings and livestock.
2. To protect the vital installations
3. To ensure the compliance of the instructions received by the Govt of the Punjab, Disaster Management Department in true letter and spirit.

He will be provided with a telephone in his office and at his residence during the flood season. He may engage junior officers and officials in a number, which he considers necessary to cope with the situation. He may seek advice and guidelines from Deputy Commissioner as and when required necessary.

vi. District Flood Control Cell / Warning Centre.

This Cell would function under the general supervision/guidance of Deputy Commissioner and under the direct control of the District Flood Relief Assistant. It would remain operational throughout the year and would deal with all correspondence relating to flood matters specifically for coordinating flood relief activities of all government and voluntaries in the district and would be responsible for dissemination of instructions/guidance received from higher quarters. The collection as well as compilation of data relating to flood situation in the district from all concerned agencies and their timely submission to Relief Commissioner would also be its duty. The cell would be located in the DC Office premises and would be staffed by the following officials:-

District Control Room**0606-920016**

Sr. No.	Name of Officer/Official	Designation	Contact No.
Control Room Leading Committee			
1.	Dr. Fayaz Ali Jattala	Control Room Incharge	DMO 0313-6477911/ 0340-4983635
2.	M. Junaid irfan	Control Room Sub-Incharge	DDMC 0308-6702755
3.	Mr. Haji M. Siddique	Flood Relief Assistant	FRA 0300-6767589

The Cell would also be provided with telephone and function round the clock during emergency. For this purpose, additional staff, it will be the DC office Staff or from the Education Department may be engaged by the District Flood Relief Officer/Incharge.

There will be 3 Flood Warning Centers/Control Cells. The District Flood Warning Center will also function as District Flood Control Cell. While, Tehsil Office Layyah & Karor will function as Tehsil Flood Warning Centers. The District Flood Relief Officer at the District level and concerned Tehsildar at Tehsil level will be the Incharge of Flood Warning Centers. During Flood season these centers will work round the clock under supervision of respective Assistant Commissioners.

The information thus received would be communicated to the Deputy Commissioner, District Flood Relief Officer and all concerns without any delay of time. The Flood Warning Centers would also have white board showing the flood figures mentioned above. The information regarding flood will be disseminated through following offices.

1. Assistant Commissioner, Layyah & Karor
2. District Emergency Officer, Layyah
3. Chief Officers MCs, Layyah, Karor Lalian, Chowk Azam, Fateh Pur & Choubara
4. Deputy Superintendent of Police Layyah & Karor Lalian
5. Deputy Director (Agriculture), Layyah & Karor Lalian
6. Deputy Director (Livestock), Layyah & Karor Lalian
7. Deputy District Officer (Health), Layyah & Karor Lalian
8. Medical Superintendent, DHQ/THQ, Layyah & Karor Lalian.
9. All Revenue Officer in the District

10. Incharges Flood Relief Sectors/Sub Sectors

vii. Tehsil Disaster Management.

The Assistant Commissioners will be Disaster Manager of the respective Tehsil. The Tehsildars would be the additional Tehsil Disaster Manager for their respective Tehsils and would streamline the functioning of the Tehsil Administrations to tackle with flood situation on similar lines as followed at the district level. They will be competent to engage the services of all government and semi government departments working in their respective Tehsils.

Tehsil Flood Control Cells would be set up at both the Tehsil Headquarters; the functions of which would be the same as that of the District Flood Control Cell. There will be flood warning centers at the Tehsil Headquarters as discussed above, which would function round the clock during emergency situation. It would be managed on rotation basis by requisitioning staff from other departments. The Assistant Commissioners and Tehsildars should also ensure that in case of any information about flood emergency, there are ample arrangements readily available to disseminate the information widely in the areas likely to be affected.

They would also be responsible for taking all necessary precautionary measures to counter potential flood threats and have a well-defined network available to carry out prompt effective relief operation in case of flood emergency. For this purpose, coordination with all the concerned departments at the Tehsil level should be made well in advance of the flood season and the entire flood plan pertaining to the Tehsils should be discussed in the meetings to be conducted by the Assistant Commissioners. It is also important that the Assistant Commissioners will anticipate the need of extra resources, especially assistance from Army for evacuation purpose well in time and communicate their demands to the DC and District Flood Relief Officer. Timely collection of information regarding the flood situation and the damage caused by flood to life, property & crops and submission of the same to the District Flood Relief Officer would also be the responsibility of the Tehsildars and ACs. It is important that there is constant and effective flow of information between the ACs and the Sector Officers (discussed in detail in chapter-5). The ACs would be responsible for taking decisions regarding evacuation as and when needed. He will seek assistance from local Police and SDPO will be fully responsible to assist him in this regard.

viii. Communication Network (Warning System).

The importance of an effective communication network for the collection, transmission and exchange of information between different officers and agencies in order to coordinate relief activities, precautionary measures and work to control flood damage, needs no emphasis. It is important to note that all officers/agencies involved in flood arrangements must ensure that any important information received by them is conveyed to the concerned quarters without any loss of time.

As mentioned earlier, information on flood situation in the River Indus would initially be conveyed both by the District as well as Tehsil Flood Warning Centers and the official on duty would be personally responsible for conveying such information immediately further to the DC and ADC and ACs respectively. Simultaneously, such information would also be conveyed immediately to the District Flood Relief Officer by both the centers and to the concerned Army Officer by the District Flood Warning Center. In case of information about high/very high flood, the District Flood Relief Officer would personally coordinate with the ACs to ensure that the relevant information is immediately disseminated through Sector Officers to the areas likely to be affected by flood. In the areas likely to be inundated by flood, people will be informed through Imam Masjid and notables list of their telephone numbers is attached. In order to ensure effective operation of the chain of communication mentioned above, it is imperative that, besides utilizing telephone and police wireless, the sector Officers should have a group of special messengers, having independent means of conveyance, readily available throughout the flood season, who could personally spread out in the areas likely to be affected to warn the people well in advance. The police and revenue staff is also to be utilized for this purpose.

The principal means of communication among different officers/agencies would be telephone and wireless. The list of telephone numbers of offices/departments concerned with flood duties. All the Police Stations in the district have facility of wireless communication. Any message meant to be communicated to a distant place within the district can be communicated to the nearest police station on telephone from where it can be transmitted through wireless.

viii. Flood Relief Centers.

The respective ACs would be responsible for selection and setting up relief centers for people evacuated from flood affected areas. It is expected that it would be ensured that the relief centers are in full operational state well before affected people start arriving in them.

Assistant Commissioners will continuously arrange for change of building identified for this purpose and any necessary change will be communicated to District Flood Relief Officer.

CHAPTER -V

STRATEGY

8.1 Evacuation:

People will be evacuated prior to flood. Following measures will be taken.

- Evacuation through motivation.
- Forced evacuation.

People will be motivated through early warnings as discussed above. In the flood prone areas where people are not willing to vacate, concerned Revenue Officers and SHOs will be engaged to force people for evacuation. Help of political representatives and notables of the concerned village will also be sought.

8.2 Dissemination of information:

- XEN, Chashma Barrage, will provide information / warning about dangerous water levels.
- The District Control Room / Focal Person for flood will inform DC, ADC, ACs and all incharges of Flood Relief Centers through SMS/ Telephone about the flood impact.
- Through control Room, information / warning regarding imminent flood will be issued. Staff deputed at control room will call Imam Masjid, Notables, and volunteers of the villages likely to be inundated and so that population of the said village may be apprised well before flood actually hit. Concerned patwari and Secretary Union Council will also be informed to approach more and more people to sensitize them about flood danger. AC offices / both ACs, and the incharges of flood relief centers will also be informed accordingly.

8.3 Rescue Strategy

Firstly, people will be rescued to the Flood Relief Camps established in both Tehsils alongwith the Flood Protection Bund. In the rescue process, the services of Rescue 1122, Army, Police, Fisheries Department, and private boat owners will be utilized. For more boats, PDMA, NDMA, will be contacted.

Following measures will be taken to rescue people.

- District Control Room will convey flood situation to Incharge Rescue 1122.
- A message regarding discharge of water at Head Chashma after every hour will be generated by District Control Room/ Focal Person.
- District Control Room (0606-920016) will receive SOS calls and will share the same with quarter concerned. A register in this regard will be maintained. Control Rooms

established in the offices of MCs and Assistant Commissioner's will perform the same function.

- Both Assistant Commissioners will remain mobile in their respective Tehsils to monitor and supervise the evacuation process. They will intimate the instant needs for evacuation i.e. boats, transport, Army or Helicopters, if required.
- People will be evacuated primarily to Relief Camps established or to Govt. buildings situated out of flood area.
- Both ACs and all incharges will be provided with wireless sets by police for effective communication.

8.4 **Medical Health Strategy**

For medication of people caught in the flood areas, following measures will be taken.

- i) Pre-flood Measures.
- ii) During flood Measures.
- iii) Post flood Measures.

Keeping in view the gravity of flood situation, CEO (Health) will take following measures.

- He will constitute medical health teams both curative as well as preventative. These teams will reach the flood affectees at their door step.
- He will also ensure availability of doctors at permanent points i.e. Rural Health Centers and Basic Health Units which are located either in the flooded area or adjacent to it.
- He will carry out fumigation in flood hit areas. MCs will also perform this function.
- He will also manage water samples from flood affected areas for examination whether the underneath water is fit for drinking or not.
- He will arrange for the distribution of Aqua Tablets used for chlorination in flood affected areas. Services of lady health worker may be utilized in this regard.
- He will manage chlorination of water tanks / wells located in flood hit areas.
- He will also ensure EPI vaccination of children. Teams constituted will go village to village in the flooded area.
- He will forward a written report encompassing the aforesaid activities to the focal person.

8.5 **Relief Operations.**

Following measures will be taken for the relief of flood affected persons.

Secretarial support.

- A suitable place preferably within the District Complex will be established as Central Store where all the relief goods will be received and issued while maintaining a proper

record. An officer of BPS-17 will be the incharge of this store. District Flood Relief officer will get prepared standardized foodhampers and these will be placed in the aforesaid store. From here, these food hampers will be dispatched to the needy flood hit areas.

- A suitable office either will be nominated as focal person. The focal person will ensure correspondence between different departments and DC, Layyah. He will gather the reports /Information from all quarters and disseminate the same to the concerned forum.
- Enough tentage will be made available at the Relief Centers established at suitable point's alongwith the flood protection bund.
- These tents/camps will be properly lit.
- Cooked food will be made available for the affectees in the relief camps.
- Medical/Health facilities will be available at camps.
- Dry food intems donated by philanthropists or managed by govt. will be distributed among the flood affectees village to village. This will be done through Patwari/Secretary Union Council/Representative of MNA/MPA and local Imam Masjid.
- The people caught in flood will be provided Wanda for their cattle.

8.6 **DATA COLLECTION STRATEGY**

Data regarding house damages and crops damages will be collected in the light of instruction issued by Provincial Disaster Management Authority, Board of Revenue, Punjab, and Lahore.

8.7 **Survey of Buildings:**

Prior to the flood, a comprehensive survey will be conducted by MCs and Buildings Department. A list of buildings with weak structures or in dilapidated conditions will be prepared and necessary action will be taken so that any untoward incident such as of 05 children died owing to the collapse of a building, may be averted.

8.8 **Burial of Dead Animals.**

- Municipal Committees will dig at least ten pits properly marked in each Union Council.
- The dead animals after having details i.e. owner's name, CNIC, Mouza, category reason of death will be buried in these pits by MCs.
- Pictorial evidence of aforesaid activity will be ensured.
- Reports in this regard will be forwarded to Focal Person for flood.

CHAPTER -VI

OPERATIONAL PLAN

7.1 Sectors (Pattans):

Both Tehsils of District Layyah have been divided into 11 Sectors namely (Pattans) controlled by one Sector /Icharge Officer each as detailed below:-

Sr. No.	Name of Pattan
1	Warra Sehran, Karor
2	Sahu Wala, Karor
3	Kanjla Wala, Layyah
4	Chandia Wala, Layyah
5	Lohanch Wala, Layyah
6	Jakhar, Layyah
7	Khokhar Wala, Layyah
8	Shah Wala, Layyah
9	Bait Gujji, Layyah
10	Bakhri Ahmad Khan, Layyah
11	Khoojay Wala, Layyah

7.2 Sector Administration

For carrying out precautionary measures and relief work in each sector, the respective ACs would appoint sector officers by 1st June. Each Sector Officer will be assisted by Patwaries / Lambardars and representatives of all Government and Semi Government Departments, especially of Revenue, Food, Agriculture, Health, Livestock, Dairy Development, Irrigation, Communication Works Department (Buildings/Highway) and Police Department, etc., if necessary. Names and designations of these persons shall be provided by 10th June to the respective ACs. The local representatives of various departments shall contact the sector officer positively by 25th June and place their services at his disposal. Every Patwari/Lambadrrar and Union Nazim of the flood area shall remain in constant contact with the Sector Officer to get information about the latest position of River/Nullahs and to communicate the same forthwith to the concerned population. The Sector Officer will also keep himself in touch with the District and Tehsil headquarters by Wireless or other quickest means available and will send daily situation report to the ACs concerned with a copy to the District Flood Control Cell/Center, through special messenger.

As soon as the Sector Officers receive information about the possibility of high flood in their respective sector areas, they would immediately communicate and disseminate this information to the area likely to be affected through Patwaris, Union Council Secretary and Local Imam Masjids and any other possible means. The Sector Officers would exercise maximum vigilance and keep the ACs constantly informed of the situation in order to enable them to take timely decision about evacuation. However, in exceptional circumstances the Sector Officers may decide and carry out evacuation operations at their own level.

7.3 Operational Procedures.

The District Control Center and Government & Non-Government Agencies, shall at all times have the personnel ready to respond to;

Alert Danger Impact		Warning

- Execute the determined actions.
- Organize the Control Center on 24 hours readiness basis.

7.5 **Impact / Its Flood - Way Forward.**

- Upon notice of disaster occurred requiring immediate assistance, the control center informs higher level and all implementing agencies concerned, requesting them to take appropriate action and execute their emergency plans.
- Dispatch rescue and evacuation team to the affected area for rescue operations and for positive verification or disaster intensity.
- Preliminary assessment of losses and damages and not requirements
- Contact, if possible, the responsible officer in the affected areas by telephone or by other means of communication to obtain information, clarification of situation and assistance requirements.
- Determine appropriate actions on the basis of available information.
- Execute the determined actions.
- The implementing Agencies shall upon receipt of information of disaster occurrence require immediate assistance execute their respective roles without delay.
- Different kinds of machinery, equipment available with various departments/Institution shall be the responsibility/liability of respective departments to keep them ready for use during the flood season.
- ACs of the Tehsils will be the authority to requisition these equipments direct for use in their Tehsil for Flood Relief work. The Heads of the respective Departments will work under the control of respective ACs. Moreover all kinds of expenditures incurred thereon will be met/borne by the respective Departments.

7.6 General.

During and after the flood, the DC, DPO, Senior Revenue Officers and other local Heads of departments will tour the affected areas for necessary instructions for smooth and prompt implementation of this plan and will pass orders for immediate relief to the affected persons.

Requisition of Army.

Relying upon the flood warnings and needs intimated by concerned Assistant Commissioners, Pakistan Army will be requisitioned as per details below.

Water Discharge at Chashma Barrage	Army to be requisitioned
3,50,000 Cusecs	01 Unit
6,50,000 Cusecs	02 Unit
More than 6,50,000	01 Brigade 04 Helicopters

Request in this regard will be forwarded to the Commanding Officer, HQ 2 Corps, Multan Cantt. Alongwith intimation to Home Department and Commissioner Office, DG Khan, Division Dera Ghazi Khan.

7.7 Disaster Preparedness Map

A special map of district has been drawn up. The following has clearly been shown therein:-

- Areas likely to be affected.
- Vulnerable points.
- Safer places.
- Flow of water.
- Bunds and embankments.
- Communication system
- Pre-selected site for relief centers.
- Warning system, Links and means of information dissemination.
- Pre-selected safer points for evacuation of people/cattle and food fodder, etc.
- Strategically Pre-selected points for Rescue Material.
- Pre-determined evacuation routes.
- Canals and distributaries.
- Drains.

CHAPTER -VII

Evacuation of Population

For this purpose, the guidelines and procedure introduced by Relief Department, Board of Revenue, Punjab, will be followed which are as under;-

6.1 Guidelines for Evacuation Plan

Types of Evacuation.

There are three types of evacuation:-

- **PRE-IMPACT:** moving people as a safety measure. This is only possible if there has been a warning. Studies show that if the risk has been properly assessed, contingency evacuation plans prepared, and people are warned effectively, then they will move in an orderly fashion. It is wrong to assume that people will act irrationally.
- **POST-IMPACT:** when there has been no warning and people are moved during the impact or as part of the rescue or rehabilitation effect.
- It is possible through early warning. When the flow of water is confirmed by Irrigation Department, the population in the effected flood hit area is sensitized through loudspeakers by local Imam Masjids, notables etc. However, people usually do not take the wake up calls seriously and they remain stationed until flood water encircles them.
- It is to rescue people when they do not pay heed to early warnings. Following procedure is adopted. District Flood Control Room informs ACs/SDPOs/all incharges of relief centers.
- The incharge of Relief Center coordinates with Rescue 1122 and private boat owners.
- People are rescued first to relief camps and then, they move towards their kith and kin as there is no tendency here to stay in relief camps.
- Boats, Trucks, Helicopters if army is requisitioned, tractor Trolleys are used in the evacuation.
- Available government buildings/schools out of flood area are best for evacuation purpose.

6.2 The evacuation phase is supervised as under:

a.	Warning	District Control Room/Flood Warning Center.
b.	Order to Move	ACs and SDPOs concerned.
c.	Movement	Tehsildar & Local Police.
d.	Shelter	NGOs & District Coordination Committee.
e.	Return	District Coordination Committee.

6.3 Key Elements of Evacuation Plan.

The key elements of Evacuation Plan will be as under:

a.	Legal authority	DC / District Collector
b.	Risks	Loss of lives, animals & properties etc.
c.	Warning measures.	Wireless, Telephone, SMS, Loudspeaker.
d.	Routes.	As ACs and SDPOs decide.
e.	Safe areas	Govt. Buildings out of the flood area.
f.	Admn. Arrangements	As decided in plan
g.	Control	District Coordination Committee and District Flood Relief Officer
h.	Communications	Wireless, Telephone, Mobile
i.	Outline Plan for Return	As per requirements.

6.4 Evacuation Order

Evacuation order will be issued by concerned Assistant Commissioners in consultation with District Coordination Committee. He will highlight following points in his orders.

- a. Why is there a need for the Evacuation?
- b. When to go?
- c. How to go (what form of transport)?
- d. Where to go?
- e. For how long?
- f. What are the administrative arrangements?
- g. What to do for further information.

For this purpose Assistant Commissioner concerned will consult local Police, Emergency Services (Rescue-1122) and local Representatives/ Lambardars.

6.5 People who do not want to move.

Assistant Commissioner and concerned SDPO will decide about the persons who do not want to move during Evacuation.

Alertness Level

Following four levels alertness have been established:

Level-D
(Disaster threat
is perceptible)

DDMA shall conduct monthly meetings besides at least 2 mock exercises as per DDMP, well in time, to make the concerned officers/officials understand their role and responsibility for better coordination and testing of rescue and relief equipment. DDMA shall also ensure the physical presence of concerned staff deputed and availability of equipment/resources for all designated vulnerable sites within given time frame during disaster. Vulnerable site's inspections and necessary works/action shall be carried out as mitigation measures.

Level-C
(Alert)
(Warning issued
but likelihood of
occurrence is
less than 100%)

Activities to be undertaken in level D

+

DDMA shall issue "alert" to all concerned for the vulnerable area. DDMA (tehsil level) control rooms be made operational 24/7 and ensure availability of all required (available and additional) resources for on call mobilization and monitor the situation 6 hourly. Only DCO and DPO shall grant leave according to the situation.

Level-B
(High Alert)
(Disaster threat
is imminent)

Activities to be undertaken in level C

+

DDMA shall issue EW to all stakeholders and "High Alert" for the district to ensure that all additional HR and material resources including volunteers has reported to their assigned duties, and all resources for evacuation and disaster management have been mobilized as per DDMP. All emergency (health, fire, rescue 1122, TMA etc) facilities shall work 24/7 with full staff strength. DDMA shall monitor the situation on hourly basis.

Level-A
(Red Alert)
(Disaster is
materialized)

Activities to be undertaken in level B

+

DDMA shall respond to the emergency immediately and shall carry out rescue and relief operation as defined in DDMP and shall continuously monitor the situation. Resources of adjoining districts shall be mobilized and Army may be called keeping in view the magnitude of the disaster.

CHAPTER -VIII

ROLE OF DIFFERENT GOVERNMENT DEPARTMENTS

5.1 Revenue Department

Revenue Department will play central role during flood emergency and after flood relief activities. All sector/sub-sector Incharges will be from among ACs, Tehsildars and Naib Tehsildars. At Tehsil level ACs will be the focal person under this plan. He will arrange coordination among MCs, Government Departments, NGOs and Philanthropist Organizations. The ADC will be the Head of Resource Committee and will work as Additional District Flood Relief Officer.

5.2 Agriculture Department

ANNEX XII:

CAMP MANAGEMENT SOPS

- Camps would be established in areas accessible by metaled roads so that provision of essential facilities is not difficult
- Basic facilities such as food, clean drinking water, health, hygiene and sanitation should be available at these shelters.
- Proper registration mechanism should be in place to differentiate between those actually affected and cunning opportunists
- Proper security system should be in place in coordination with the local police as the presence of police always acts as deterrence for criminals who may be attracted to such places.
- Emergency medical care should be available as well as a proper firefighting system as fire out breaks are common in such tents
- Proper camp management should be announced and notified and there should be a complaint cell as well
- A proper distribution mechanism should be in place to ensure that the needy get what they deserve.
- Scattered camps should be catered for and encouraged to join the main camp.
- At times shallow hand pumps are not safe for drinking as the water underground has been affected. In such cases clean medicated water should be provided through water bowsers.
- Vector control is an essential part of the camp management and steps should be taken to remove rats, snakes and mosquitoes etc.
- Un-accompanied and missing children shall be placed separately with proper care and fulfilment of their physical and psycho-social needs.
- Needs of women as per local and cultural environment shall be considered for establishing separate relief camps for ladies with provision of proper security and light arrangements.
