## EXECUTIVE SUMMARY

The District Attock lies between 33°-00' to 34°-00'north latitude and 71°-43' to 72°-56' east longitude.

Attock has generally not been a flood prone district. There are two major Rivers flowing through the District i.e; Indus & Harro. Even during high floods, very few people are affected; most of whom dwell in low lying areas in river beds. Generally at the onset of rainy season, they are warned to vacate the area through announcements, early warning etc. Two major terrorist attacks have struck Attock in recent past; first one at PAC, Kamra in 2013 and other at Shadi Khan on the house of Col. (R) Shuja Khanzada (Provincial Interior Minister) in 2015. Additionally, intelligence agencies have warned against possible attacks on PAC and NDC Kalachitta. There is no recorded history of flash floods or hill torrents in the area. The district has witnessed two major earthquakes of 2005 and 2015 in recent past with no major losses.

## AIM AND OBJECTIVES

The plan is aimed to manage emergencies by putting in place requisite mitigation measures and a well-coordinated and integrated response at district level

The main objectives of the plan include:

- To develop a plan of action for the District Disaster Management Authority and other district stakeholders to set priorities and provide directions for disaster management;
- To define the roles of various stakeholders in disaster management in all the phases pre, during and after disaster;
- To raise awareness of stakeholders about disaster risks and the requirements for disaster management;
- To introduce coordination mechanism for immediate response and rehabilitation at district level;
- To enhance the effectiveness and timeliness of emergency response through the clarification of goals, strategies, roles and responsibilities;
- To strengthen response coordination between government departments and humanitarian organizations (UN agencies/ NGOs);

**General Information**

Particulars	Detail
Neighboring districts and their vulnerabilities	Rawalpindi, Chakwal, Newshehra, Haripur, Kohat, Mianwali
Topographical Features	<p>The topography of the district is a combination of hills and plains. The area in the north- west and south is hilly. On the north, hills are southern extension of the hills of Abbottabad district ,the southern hills of the Gandgar range of Haripur district form a projection in the north of Attock Tehsil. In the middle of the district, along its western boundary in Jand and Attock Sub-Divisions are the famous Kala Chitta hills. This range is almost56 kilometers long and attains its greatest height in the west near Indus River where it rises to more than 1,000 meter. The range is rugged and is covered with shrub forest. There are several isolated ridges. The eastern boundary of the district is the Soan River. The Kheri Moorat range separates Tehsil Fateh Jang of this district from Chakwal. This ridge rises to a height of about 950 meter. On southern boundary of the district is the Soan River which meets the Indus. An important feature of the topology of Attock district is the general slope, which is from north-east to south-west. Fateh Jang and Pindi Gheb tehsils are upland plains, which are dissected by numerous streams and hills.</p> <p>The district is divided into two portions i.e., one to the north and north-west of the Kala Chitta range and the other to the south and east of it. The former includes Attock, Hazro and Hasan Abdal tehsils and the latter includes Fateh Jang,PindiGheb and part of Jand tehsil. The district consists of a mix of plain and hilly areas</p>
Weather/Climate pattern	e.g. max. and min. temperature, annual precipitation, storms, heat waves, snow fall etc. The climate of the district is extreme. The area south of the Kala Chitta is an upland plateau. It is intensely hot in summer while in winter a chilly north wind prevails. The extreme of hot and cold weathers are very severe. The high upland plateau which forms the whole of the district south of the Kala Chitta range is baked under a hot sun in the summer, and in winter iced wind prevails, the cold being often intense. In Attock tehsil the summer is short and cold weather is long and severe. The climate is more variable than that of the ordinary western Punjab districts; being affected by strong winds.

	<p>Although summer sets in late April, evenings are pleasant due to cold breeze. Minor rise in temperature is followed by monsoon rains which bring down the temperature. In the second half of May temperature rises again. Monsoon rains generally start pouring by mid July. Even in the hottest months it is unusual to have hot nights consecutively, summer is experienced in the western portion of the district i.e the rocky plateau of Attock, sandy slopes of Jandal, low hills of Nara and Makhad and is almost unbearable even for the natives of this tract of land. Water wells and tanks dry up during the hot blows of wind, while the glare of sun reflecting from sand dazzles the eyes. The breaks in the rains are much longer in this part of Attock and even in August sometimes the area turns into a hot furnace. The inhabitants are nevertheless a fine robust race weathering the severe climate generation upon generation. Rainy season generally ends in the beginning of September. Nights start being cold by the end of the month or early October while regular winter sets in November. Winter rains, though infrequent are not unheard of. Changing climate pattern is however bringing in more regular rains.</p>
Major Rivers	<p>Name of river, passing through areas along with length in the district Major Barrages and their Flood levels River Indus, River Harro. The Indus River flows along the Western boundary of the district for about 150 Kilometers separating Attock from KPK. Areas lying along the bed of River Indus are Villages of Hazro. i-e, Garhimatani, painda, Fatu Chack, Waisa, etc.</p>
Major Nullahs /Streams	<p>Name of river, passing through areas along with length in the district Flood levels The Indus River flows along the Western boundary of the district for about 130 Kilometers 750000Cusic</p>
Motorway/Highway	<p>Vulnerable points of motorway/highway Motorway (M-1) which passes through Tehsil Fateh Jang, Hassanabdal and Hazro and connecting interprovincial system of KPK and Punjab. Although, there is minimum presence of smog/ visibility issues however, possibility of major traffic accidents is there. G.T road is also an inter-provincial route especially for cargo and heavy transportation. Occurrences of road traffic accidents are high here due to poor road management. CPEC (M-14) route is also passing through District Attock and therefore the possibility of RTA's is high here.</p>
Railways	<p>Vulnerable points of Railway Railway route from Attock to Basal is vulnerable for accidents and is problematic due to no access through road.</p>
Geological features	<p>e.g. fault line, mountainous areas etc. In Jand and Attock Sub-Divisions are the famous Kala Chitta hills. This range is almost 56 kilometers and attains its greatest height in the west near the Indus River where it rises to more than 1,000 meters. The range is rugged and is covered with bush forest. There are several isolated ridges. The Kheri Moorat ranges cut near the boundary in Fateh Jang Tehsil. This ridge rises to a height of about 950 meters. An important feature of the topology of Attock district is the general slope, which is from north-east to south-west. Fateh Jang and Pindi Gheb tehsils are upland plains, which are dissected by numerous streams and hills.</p>

Nil	Nil	Nil	Nil	Nil	Nil	Nil

**Note:** In District Attock, the Indus flows through a naturally confined corridor—often a rocky and elevated terrain, especially around Attock Khurd and the Attock Gorge.

This **natural containment reduces the need for artificial embankments or bunds**, as the river rarely threatens to spill over in this region.

**Breaching Section**

Name of Bund/ Embankment	Name of Breaching Section	Location with GPS Coordinates	Likely Affected Population			Likely Affected Revenue Estate	Remarks
			Male	Female	Children		
Nil	Nil	Nil	Nil	Nil	Nil	Nil	

**Note:** The Indus in Attock flows through a **relatively confined and rocky channel**, especially near the Attock Gorge and Attock Fort area. This **limits the potential for breaching**, making it *less prone* to spill into surrounding lands compared to the flat plains further downstream (like in Sindh).

- m) take such other steps as may be required or warranted to be taken in such a situation.

**Revenue Department (Functions and Responsibilities)**

In case of any disaster or calamity the head of the revenue department in the district i.e. the DC/DC should ensure that the following measures and steps have been taken

- Taking everyone onboard is perhaps the most important thing to do. Regular meetings of DDMA should be held to clearly highlight the roles and duties of DPOs, EDOs, XENs etc.
- Pre-flood meeting should be held and duties of all concerned officers and departments should be clearly defined and assigned.
- A district disaster management plan should be prepared using the set template and updated regarding any disaster or emergency that may strike the district.
- A focal person for the disaster or calamity should be nominated and his/her number should be communicated to all concerned departments.
- Proper stock taking should be done regarding available stocks of food and rations. Similarly stock regarding machinery and equipment should also be taken and inventories should be prepared. Out of order machinery should be repaired or replaced.
- Committees should be formed and constituted which will deal with various functions during a flood or emergency. Purchasing of food items, food, and machinery should all be done through committees.
- Identification of Low lying, medium and high vulnerability levels with flood level
- In case of evacuation the district administration should be very clear about the places where the relief camps or shelters will be established. Teams should be formulated which will look after these camps and will be in-charge for provision of tents, food, water and maintaining general law and order. Provision of cooked food is also to be ensured.
- Proper warehouses and stores should be made available for storing of aid and donated items that may be received from authorities such as PDMA, WFP etc. A committee should be constituted to look after the record of all the items in the store.
- Proper crop surveys or girdawaris should be conducted through the revenue officials so that crop damage assessment can be made after disaster or flood affects the district. These surveys will also help in determining the identity of the true owners as well.
- Post damage assessment should be carried out by joint teams constituted of patwaris, teachers, and agriculture field assistants. Technology should be involved and android sets should be used to gather accurate data.

- Round the clock active control rooms should be set up and the numbers are circulated to all concerned. The control rooms should be equipped with wireless, telephones and computers. All info gathered or received should be conveyed to the concerned. The control room should have representatives of concerned departments such as police, health, 1122, and revenue.
- Early warning is critical in saving lives. The local revenue officials along with local police should be deployed to warn the people against the oncoming disaster and to urge them to vacate the disaster prone areas and villages. Loudspeakers, mosque speakers and word of mouth should be used. Banners and posters can also be used.
- Data collection is of prime importance and the senior network administrator should be declared as the focal person for collection of relevant information such as number of casualties, damages to infrastructure, injured, perished livestock etc. for onward submission to PDMA etc.
- Mock exercises should be carried out along with all concerned departments specially 1122, Police, civil defense and Pakistan army regarding the action plan during any emergency or flood. This will give a fair idea about the preparedness of the district.
- Availability of vehicles should be ensured for use during any emergency especially off road vehicles like jeeps.
- Suitable locations should be identified for accommodating armed forces like the Pakistan army. Normally schools, colleges or stadiums are allocated for the armed forces.

#### **Check list for Revenue Department:**

- Liaison of Patwari with Numberdars of their respective villages
- Contacts of all revenue staff posted near river belts and their output in flood prone areas
- List of Numberdars with their contacts, volunteer from low lying settlements with contact numbers
- Prepare list of vulnerable villages and make an estimate of likely affected population in such villages in the event of flood
- Name and contact numbers of private boat owners and operators Announcement of Flood Warning at settlement level – Patwari responsible Forced evacuation with police
- Rapid assessment for relief goods and ration provision Coordination and reporting
- Carry out survey of entire flood affected areas to assess losses in collaboration with Agriculture, Livestock and Education Department
- Conduct crop damaged/house damaged surveys

#### **Metropolitan / Municipal Corporations Municipal / Town Committees**

- Local Bodies play an important role of providing municipal services in the district including clean drinking water, sanitation facilities, maintenance of parks and removal of encroachment etc.
- Local Bodies will provide assistance to the District Administration for setting up and management of relief camps/operations.
- Local Bodies are responsible for provision & restoration of water and sanitation facilities in their municipalities besides disposal of waste or rain water/sewerage.
- Local Bodies are equipped with trucks, water bowsers, tractors, dewatering sets, bulldozers, loaders and dump trucks. All of these equipment are utilized to restore proper sanitary facilities, ensure the delivery of clean water and remove debris or excess water.
- Local Bodies sanitary workers can be employed for cleaning relief camps, or other such areas which has been affected by any disaster.

- Local Bodies employ de-watering sets to remove excess water. All Local Bodies are required to ensure the maintenance of all dewatering sets prior to the monsoon season. The Local Bodies maintain a list of all the choking points where rainy water accumulates as a result of heavy storms which can cause urban flooding.
- Local Bodies should ensure supply of clean drinking water in overhead reservoirs and ensure supply to the affected areas or relief camps through water bowsers. Clean drinking water is a major issue and requirement during any disaster.
- In case of any disaster that requires people to be relocated, the Local Bodies under the concerned Administrator i.e Commissioner/DC/AC will assist in the migration of the affected people.
- During the relief effort and subsequent rehabilitation effort the Local Bodies manpower can be effectively used for the distribution of food and essential commodities among evacuated people or any other relief activity such as provision of cash compensation.

### District Disaster Management Authority (DDMA)

- DDMA's are created under the NDM Act 2010 under Chapter IV Section 18 and the law defines their composition and also outlines their functions, duties and powers.
- District Disaster Management Authorities are the first line of defense and the implementing arm of the government policy and plans. Within the district there are three to four key players/departments that have to put up a joint and coordinated effort in order to fight with and handle any disaster under the leadership and coordination of the DC. The office of the DC fully supported by the DPO and line departments such as Health, Agriculture, Livestock, Civil Defence, 1122, Local Bodies and the Revenue Department form the main disaster management team within any given district. This plan is an effort to highlight their sets of responsibilities followed by the role of provincial departments.
- All district administrations had prepared a detailed contingency plan to face any disaster or hazard specially floods which until recently have become an annual affair for some districts.
- The district administration will divide the area as per district division with the Assistant Commissioner as in charge of his/her tehsil. All disaster related activities in a said tehsil will be coordinated through the concerned AC and the Local Bodies.
- On receipt of a flood warning, immediate warning will be conveyed to all the concerned officers. Immediate action will be taken in each sector/subsector for evacuation of the population from risk prone areas to safer places or to Relief Camps. An Assistant Commissioner will ensure that announcements are made through loudspeakers of the mosques utilizing the services of the Revenue department. Each Patwari will inform the Numbardar, Headmaster of the School, Imam Masjid and councilors to make announcements etc.
- The tactical operations would be headed by the Additional District Collector (ADC). The ADC would be responsible for coordinating and supervising the disaster control and relief measures in the district.
- Provincial government had notified the following composition of DDMA's for whole of the province
  - i. **Deputy Commissioner (Chairperson)**
  - ii. District Police Officer
  - iii. Additional Deputy Commissioner (Rev)
  - iv. Two Elected Representatives to be nominated by the Chair
  - v. Representative of Pak Army
  - vi. Two Representatives of NGOs/Civil Society to be nominated by the Chair
  - vii. Additional Deputy Commissioner (General)
  - viii. Additional Deputy Commissioner(F&P)
  - ix. XEN Buildings

- x. XEN Highways
- xi. Chief Executive Officer(DHA)
- xii. Chief Executive Officer(DEA)
- xiii. SP Special Branch
- xiv. XEN Irrigation/ Public Health
- xv. District Officer Civil Defense
- xvi. Administrators of Tehsil Councils/ Municipal Corporations
- xvii. All Chief Officers of Local Bodies in District
- xviii. District Emergency Officer, Rescue1122 (Secretary)
- xix. Representative of Red Crescent
- xx. Such other District level Officers to be appointed by District Administration

- District Administrations must establish a Disaster/Flood control room at the DC's office, the numbers of which will be circulated to all concerned. The Disaster/Flood Control Room has to maintain updated information regarding the threat of disaster and statistics post disaster. The center will maintain a regular communication with the Flood Forecasting Division or the dam authorities upstream in case of a flood.
- The District Administration would immediately mobilize the equipment needed to tackle the challenges created by a disaster. The District Administrations will provide a comprehensive list of flood fighting equipment to PDMA as part of their flood contingency plans.
- Executive District Officer (Health) will ensure the availability of adequate medicines for treatment of common issues, particularly for snake and dog bite cases, and general vaccines at each relief camp.
- DO (Agriculture) and DO Livestock would arrange fodder and feed supplement for livestock and animals displaced.
- District Regional Transport Authorities (DRTA) in all 36 districts of Punjab are managed by Secretaries who would coordinate with local transporters to arrange for arranging transport required for evacuation of people from affected areas. In case of shortfall in transport in a particular district, the adjoining district would mobilize the transporters in his district to assist with the evacuation of people.

### **Role of Rescue1122 in district during disaster**

- The immediate evacuation of people from the disaster prone and vulnerable areas.
- Provision of immediate medical aid during any emergency and at the same time transporting the injured or sick to the nearby hospital through their team of ambulances.
- In flood situations rescuing people from drowning in the strong currents is a specialty of 1122 as it has its own set of divers and boats. Similarly in case of collapsed buildings or structures the 1122 is equipped with heavy machinery to cut through heavy debris.
- Apart from that responsible deployment of firefighters, cordoning of hazardous areas, provision of first aid and medical treatment, immediate search and rescue of victims and management of the pre-hospital emergency system.
- Rescue 1122 is well trained in setting up medical camps for provision of emergency medical treatment. These camps are set up by Rescue 1122's doctors and paramedic staff.

# RISK ANALYSIS

## 1. Potential hazards of the district

Hazards	Likelihood (Score1-5)	Impact (Score1-5)	Risk
Floods	2	1	2
Urban Flooding	1	1	1
Flash Floods	1	1	1
Hill Torrent	1	1	1
Glacial Lake Outburst Flood(GLOF)	1	1	1
Landslide	1	1	1
Tornado	1	1	1
Earthquake	2	4	8
Drought	1	1	1
Epidemic	2	4	8
Fire Incidents	1	4	4
Other Major Accidents (Building Collapse, road traffic accidents, train accident, Stampede, plane crash)	2	4	8
Environmental Hazards (industrial accidents, severe pollution etc.)	2	2	4

Risk=Impact x Likelihood

Low : 1-7

Medium : 8-14

High : 15-25

2.Hazards

- Disasters occurred over the past two to three decades and their impact on communities and development sectors •
- Provide a brief description of the hazards being planned for (medium and high risks), including potential location that could be affected; •
- Briefly outline the triggers Over the past two or three decades there is no major Disaster history in Attock.

Floods and Earthquakes have negligible impact on communities and development sector. There are Fire incidents, Road Traffic Accidents, Building Collapse etc but not to an extent to be counted towards Disasters. In district Attock the current building/building's structures are not according to building codes/bylaws and do not meet fire safety standard too. Rescue 1122, Attock has already conducted Basic Life Support trainings, Emergency Evacuation Drills to the educational Institution/departments. The hazard may be minimized if proper building codes/bylaws and fire safety standards would be adapted.

## 5.Gaps and Constraints

*Briefly outline the capacity gaps in the provision of rescue and response;*

*Describe major obstacles to providing humanitarian assistance (security, access constraints, administrative obstacles, logistics ,etc.)*

- To Rescue from within Collapsed structures, District Attock lacks in search and rescue equipment.
- While considering Road Traffic Accidents District Attock lacks Cutting and spreading tools for extrication of victims trapped in vehicles.
- Security Measures should be taken so that the operational staff working at the incident location may continue to work without any fear. Good security measure can improve the efficiency of work.
- • Administrative Obstacles: • Sometimes lack of communication between departments and administration may affect the performance and optimal output.
- • Logistics: • Provision of logistics at right time is necessary for successful operation. There are no elaborate arrangements for food, drinking water, rest etc. for rescue and relief parties during prolonged operations

## MITIGATION STRATEGY

- ✓ Briefly describe what measures could be taken to reduce the impact of the potential disasters.
- ✓ Strategic pre-positioning of available relief stocks
- ✓ Public education and community awareness

## ANNEX-XII: CAMP MANAGEMENT SOPs

- Camps would be established in areas accessible by metalled roads so that provision of essential facilities is not difficult
- Basic facilities such as food, clean drinking water, health, hygiene and sanitation should be available at these shelters.
- Proper registration mechanism should be in place to differentiate between those actually affected and cunning opportunists
- Proper security system should be in place in coordination with the local police as the presence of police always acts as deterrence for criminals who may be attracted to such places..
- Emergency medical care should be available as well as a proper firefighting system as fire out breaks are common in such tents
- Proper camp management should be announced and notified and there should be a complaint cell as well
- A proper distribution mechanism should be in place to ensure that the needy get what they deserve.
- Scattered camps should be catered for and encouraged to join the main camp.
- At times shallow hand pumps are not safe for drinking as the water underground has been affected. medicated water should be provided through water bowsers.
- Vector control is an essential part of the camp management and steps should be taken to remove rats, snakes and mosquitoes etc.
- Un-accompanied and missing children shall be placed separately with proper care and fulfilment of their physical and psycho-social needs.
- Needs of women as per local and cultural environment shall be considered for establishing separate relief camps for ladies with provision of proper security and light arrangements.

## ANNEX-XV: LIST OF BASIC TERMS

### Acceptable risk

The level of loss a society or community considers it can live with and for which it does not need to invest in mitigation.

### Biological hazard

Biological vectors, micro-organisms, toxins and bioactive substances, which may cause the loss of life or injury, property damage, social and economic disruption or environmental degradation.

### Capacity

A combination of all the strengths and resources available within a community, society or organization that can reduce the level of risk, or the effects of a disaster. Capacity may include physical, institutional, social or economic means as well as skilled personnel or collective attributes such as leadership and management. Capacity may also be described as capability.

### Capacity building

Efforts aimed to develop human skills or societal infrastructure within a community or organization needed to reduce the level of risk. In extended understanding, capacity building also includes development of institutional, financial, political and other resources, at different levels of the society.

### Climate change

The climate of a place or region is changed if over an extended period (typically decades or longer) there is a statistically significant change in measurements of either the mean temperature or variability of the climate for that region.

### Coping capacity

The means by which people or organizations use available resources and abilities to face a disaster. In general, this involves managing resources, both in normal times as well as during crises or adverse conditions.

### Disaster

A serious disruption of the functioning of a community or society causing widespread human, material, economic or environmental losses which exceed the ability of the affected community or society to cope using its own resources. It results from the combination of hazards, conditions of vulnerability and insufficient capacity to reduce the potential negative consequences of risk.

### Disaster risk management (DRM)

The comprehensive approach to reduce the adverse impacts of a disaster. DRM encompasses all actions taken before, during, and after the disasters. It includes activities on mitigation, preparedness, emergency response, recovery, rehabilitation, and reconstruction.

### Disaster risk reduction/disaster reduction

The measures aimed to minimize vulnerabilities and disaster risk throughout a society, to avoid (prevention) or to limit (mitigation and preparedness) the adverse impacts of hazards, within the broad context of sustainable development.

### Early warning

The provision of timely and effective information, through identified institutions, to communities and individuals so that they could take action to reduce their risks and prepare for effective response.

### Emergency management

The management and deployment of resources for dealing with all aspects of emergencies, particularly preparedness, response and rehabilitation.

### Forecast

Estimate of the occurrence of a future event (UNESCO, WMO). This term is used with different meanings in different disciplines.

### Geological hazard

Natural earth processes that may cause the loss of life or injury, property damage, social and economic disruption or environmental degradation. For example earthquakes, tsunamis, volcanic activity and emissions, landslides, rockslides, rock falls or avalanches, surface collapses, expansive soils and debris or mudflows.
